## **DETAILED ACTION**

### **Response to the applicant's amendments**

Claims 1-18 have been cancelled.

Claims 19-36 are pending.

### **Election / Restriction**

Restriction to one of the following invention is required under 35 U.S.C. 121

- I. Claims 19-24 drawn to method of delivering ads classified in class 709, subclass 219.
- II. Claims 25-27, drawn to method of retrieving and pushing member profile information classified in class 713, subclass 189.
- III. Claims 28-38, drawn to method of synchronizing and processing member records classified in class 707, subclass 201.

The invention are distinct, each from the other because of the following reasons:

Invention I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as displaying a message on the screen. Invention II has separate utility such as performing a point of sale transaction. Invention III also has separate utility such as executing a plurality of command blocks using the plurality of execution units. See (MPEP 806.05 (d))

Art Unit: 2133

Because these inventions are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reason given above and the search required for group I is not required for group II or group III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reason given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. David J. Meyer and Mr. Robert Becker on March 3 and 4, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least on claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and the fee required under 37 CFR 1.17(i).
